

PYODERM

Your Cutaneous Infections Partner

An effective topical shampoo to aid in the treatment of Cutaneous Infections.

Shaping the future of animal health

PYODERM

Your Cutaneous infections Partner thanks to these outstanding qualities:

An **ideal concentration of 3 %** for strong and rapid action⁽¹⁾

Non-ionic Spherulite technology for **deep skin penetration**

Active ingredient **Chlorhexidine digluconate.**
A reference antimicrobial and antifungal molecule

Antifungal properties comparable to dedicated antifungals like Miconazole on Malassezia⁽²⁾

Formulated with **mild cleansing agents** adjusted to the PH of the pets skin

5 THINGS YOU SHOULD ASK YOURSELF BEFORE RECOMMENDING A SHAMPOO:

- 1 Is it manufactured by an international company following European Standard and Good Manufacturing Process?
- 2 Has it been scientifically researched and formulated by a company that is regarded as one of the innovators in dermatology?
- 3 Is it effective, safe and consistent?
- 4 Has its efficacy been proven?
- 5 Is it recommended and used by Veterinary Dermatologists?

1. Lloyd et al, Activity of chlorhexidine shampoos in vitro against Staphylococcus intermedius, Pseudomonas aeruginosa, and Malassezia pachydermatis; The Veterinary Record, May 8, 1999.
2. Lloyd and Lamport; proceedings of the 4th World Congress of Veterinary Dermatology, San Francisco, Ca, USA, August 30 September 2, 2000.
